Profile

I'm an enthusiastic and curious person, who is interested in IT and everything in its orbit. I am a Front-end developer with over three years of experience. Why front-end? I was always attracted to creativity, but at the university, it became clear that I was an engineer with my brain. For me, front-end development is a great opportunity to combine these two areas, to get creativity as a result of technical methods.

Experience

Front-end developer, *XB Software*

11/2023 – current
